

CITRA PEEL

STRIPPER & COATING REMOVER

CITRA PEEL IS AN INDUSTRIAL STRENGTH STRIPPER THAT REMOVES ALL TYPES OF COATINGS AND ACRYLIC SEALERS FROM ALL CONCRETE SURFACES. A NON-FLAMMABLE STRIPPER WITH VERY LOW ODOR MAKES CITRA PEEL IDEAL FOR INTERIOR USE.

PRODUCT HIGHLIGHTS

- **Non-flammable formula:** Citra Peel is completely non-combustible and much safer to use indoors than any xylene-based coating remover.
- **Fast action:** Citra Peel will penetrate and soften the acrylic coating in 20 to 30 minutes so that it can be scraped or pressure flushed off easily. Heavy coatings may require two treatments.
- **No neutralizing necessary:** Citra Peel contains no acids or harmful reactive components. Just rinse it off and let the floor dry. Where old colors are to be removed, Super Blue may be applied immediately.
- **Economical:** The fast acting Citra Peel formula means less labor and less time wasted. This saves money.
- **Stable in storage:** Stored in it's original container, Citra Peel remains stable for long periods of time.
- **Available in 1 gallon and 5 gallon.**

USES

Citra Peel is used to strip off old acrylic sealer where ground-in soil makes the area look dingy. It can also be used to remove the sealer where a color change is desired.

In conjunction with Super Blue it is ideal in renovating and redoing a concrete floor.

QUICK LOOK:

Type: Nonflammable, water based coating remover

Toxicity: Harmful if swallowed

VOC's: ~2 lbs/gal.

Flammability: Non-flammable

Composition: Biodegradable surfactants, citrus terpenes and non-chlorinated solvents in an aqueous base

Color: Orange

Odor: Slight citrus

Coverage:

**Coverage rates may vary depending on porosity, texture, application method and prior sealer application. Excess buildup should be avoided.*

CITRA PEEL

HOW TO USE:

To remove acrylic sealers and concrete coatings:

Apply a liberal coat of Citra Peel and let penetrate for 20 minutes.

Cover with a plastic sheeting to minimize evaporation. Do not allow to dry.

Break up surface with a hard brush. Let stand for 5 more minutes.

Spritz area with water then brush and scrape surface clean.

Remove discarded material with shop vac.

**A test area is recommended.*
